

Remote Environmental Compliance Auditing Services

Ensure your workplace is in compliance with all of the latest regulations in air emissions, wastewater discharge, solid and hazardous waste disposal, and spills by conducting a remote audit with our team of specialized engineers.

THE VALUE OF A REMOTE AUDIT

Assess Compliance:

Ensure your facility stays in legal compliance with regional regulations, and global standards for environmental management, i.e. ISO 14001.

Identify Risks or Liabilities:

Identify tasks that must be addressed

at the facility to minimize ongoing risks and liabilities.

Reduce Costs:

A remote environmental audit is cost-effective, safe and can help your facility save money by identifying deficiencies and costly issues.

WHAT IS A REMOTE ENVIRONMENTAL COMPLIANCE AUDIT?

Step 1 - Pre-Audit:

Altech's team of auditors will develop an audit plan and review the applicable regulations to initiate the remote audit process.

Step 2 - Remote Site Visit and Data Collection:

A certified auditor will set-up an opening meeting to review the virtual audit plan, collect records & documents, and interview site

personnel. The auditor assesses the evidence, develops preliminary findings and conducts an exit meeting to review their results.

Step 3 - Report:

The auditor develops in-depth findings in-line with the exit meeting, provides recommended actions with priority rankings, and prepares a draft report in co-operation with facility staff and management before finalizing.

WHY ALTECH?

Cost-Effective:

We save our clients money by implementing remote solutions and by recommending actions that will improve efficiencies and avoid potential liabilities to generate both short and long-term savings.

Responsive: We respond to all requests within 24 hours, and strive to mobilize within 48 hours.

Certified:

Since 1986, our certified Environmental Auditors and Senior Consultants have helped hundreds of industrial facilities across Canada find cost-effective solutions to environmental and compliance challenges.
