

CHARTECH SOLUTIONS

AN EXPERIENCED LEADER IN INDUSTRIAL CLEAN AIR, ENERGY AND WATER TECHNOLOGY

INDUSTRIAL WATER & WASTEWATER SERVICES

CharTech understands industrial water and wastewater issues. We perform detailed engineering evaluations of processes, complete government applications, and secure rebates with the goal to deliver cost savings and operational efficiencies for our clients.

CHARTECH'S SOLUTIONS TO REDUCE THE COSTS OF WATER AND WASTEWATER

- 1. Water Conservation Plan and Sewer Surcharge Rebate Report:**
Evaluate your water consumption and the wastewater generated on-site and create a rebate report to realize savings opportunities provided by multiple municipalities.
- 2. Upstream pollution prevention and control strategies:**
Reduce your water consumption and wastewater generation by implementing changes that reduce pollution, and promote water reuse and recycling.
- 3. Downstream wastewater treatment technologies:**
Build and implement innovative water treatment solutions to meet bylaw limits and/or close the loop on-site.
- 4. Pollution Prevention (P2) plan:**
Comply with your city requirements by quantifying subject pollutants and identifying means to help minimize and/or avoid their use – resulting in reduced liability and operational costs.

SAVE MONEY AND WATER THROUGH GOVERNMENT INCENTIVE PROGRAMS

- 1. Industrial Water Rate Program (Block 2 Rate):**
Manufacturers can receive a 30% discounted water rate by implementing a water conservation plan.
- 2. Sewer Surcharge Rebate Program:**
Receive a significant rebate on water not discharged into the sanitary sewer system by calculating:
 - a) Water used as an ingredient
 - b) Evaporated water quantity
 - c) Water used for irrigation
