

## **Project Engineer, Environmental Permitting & Compliance Hybrid (Remote/Toronto, ON)**

A career at Altech Environmental Consulting is like none other. You'll be challenged, inspired and, at the end of the day, proud. Because whatever you do for us, you'll be helping our Clients improve the environment while enhancing their businesses. We offer a stimulating work environment, competitive salaries and opportunities for career advancement. If you're ready to help make a difference for the environment within Canada's leading industries, this posting is for you!

We're looking for a passionate Project Engineer to join our growing consulting group. You will play a pivotal role in developing our business, as well as offering your technical expertise on projects from our Environmental Permitting & Compliance team.

### **Your Role**

- Reporting to the Permitting & Compliance Practice Lead, you will manage, and participate on projects related to environmental compliance approvals, annual environmental reporting, environmental engineering, environmental compliance auditing, and compliance management consulting for Clients across Ontario
- You will provide technical support on projects by completing site investigations, drawings, emissions quantification, atmospheric dispersion modelling, writing ESDM reports, annual environmental assessments and MECP approval applications (ECA, EASR, NPRI, GHG, ChemTRAC), compliance and best management practices procedure documents, and environmental compliance audits
- Liaise with MECP and Client Plant, EHS and Site Managers/Representatives
- Prepare proposal documents and manage project budgets, invoicing, and sub-contractors
- Participate in business development initiatives to build new Client base, and strengthen existing Client relationships
- Provide leadership and mentoring to junior team members

### **The Ideal Candidate**

- Bachelor's or master's degree in Chemical, Mechanical, Civil, or Environmental Engineering with Ontario Professional Engineer (P.Eng.) designation
- 3 - 5 years of related experience
- Thorough understanding of Canadian Environmental Legislation, with focus on Ontario specific regulations concerning Environmental Approvals (Air, Noise, Water and/or Waste), National Pollutant Release Inventory (NPRI) Reporting, Greenhouse Gas Reporting, and Environmental Compliance Auditing
- Experience in water and wastewater compliance, including investigations, sampling, P2 Plans, and sewer surcharge programs

[www.altech-group.com](http://www.altech-group.com)

- A knack for networking and building long-term Client relationships
- Strong technical abilities with a willingness to be feet on the ground when needed
- Innovative thinker, idea contributor, and authentic team player
- Experience with Microsoft Office products, AutoCAD, AERMOD, ASHRAE, and Cadna/A (preferred)

This position requires a high level of communication skill, both verbal and written. The candidate will be encouraged to, on occasion, attend networking events, participate in webinars, and speak publicly on technical topics related to Altech services. The ideal candidate will be comfortable conversing with existing and potential Clients and be able to identify and follow up on Client leads. The candidate must demonstrate a high level of critical thinking skills in order to solve problems and deliver exceptional solutions and service to our Clients. The position does require short-term work-related travel for site-visits, therefore, a personal vehicle is needed. All work-related travel expenses will be compensated.

### **More About Us**

Since 1986, Altech has partnered with its large, loyal, industrial customer base to expertly identify and implement environmental solutions that help Clients measurably meet their Environmental, Social and Governance (ESG) targets and improve compliance, while reducing their financial and regulatory risks. As a key part of the publicly traded high growth Canadian cleantech firm, CHAR Technologies Ltd. (TSXV:YES), Altech's engineers and scientists combine long-term relationships with a flexible approach and deep regulatory knowledge, to help our Clients meet their goals of optimizing profits while protecting and preserving the environment.

### **Permitting & Compliance**

As jurisdictional environmental permitting and reporting requirements become more complex, our engineers and scientists provide advanced air modeling, noise assessment and mitigation, dust and odour control, carbon footprint analysis and reduction, and stormwater and wastewater permitting support for a wide range of manufacturing Clients, to meet compliance obligations.

The team applies its up-to-date regulatory knowledge to ensure Clients' workplaces are always in compliance with the latest requirements in indoor air quality, outdoor air emissions, wastewater discharge, solid and hazardous waste disposal, and spills. Altech's specialized Environmental Compliance Audit, and custom Compliance Management Programs, deliver recommended actions that improve efficiencies and avoid potential liabilities.

To apply, please send your cover letter and resume to [hr@altech-group.com](mailto:hr@altech-group.com), referencing opportunity no. PC22-01 in the subject line.
