

Junior Project Consultant, Consulting Engineering & Compliance
16 Month Co-op Position
Hybrid (Remote/Toronto, ON)

A career at Altech Environmental Consulting is like none other. You'll be challenged, inspired and, at the end of the day, proud. Because whatever you do for us, you'll be helping our Clients improve the environment while enhancing their businesses. We offer a stimulating work environment, competitive salaries and opportunities for career advancement. If you're ready to help make a difference for the environment within Canada's leading industries, this posting is for you!

We're looking for a passionate Project Consultant to join our growing Consulting group. You will play pivotal role in supporting all aspects of our business and get the opportunity to hone your technical skills on projects from both our Property Due Diligence & Remediation and Permitting & Compliance teams.

Your Role

- Support the Property Due Diligence & Remediation team members by performing activities related to Phase I and II Environmental Site Assessments and remediation, and related projects including on-site field work, water and soil sample collection, identifying recommended actions, and preparing reports
- Coordinating with external laboratories (sample packaging, transmittals, data analysis and billing review), as required
- Support the Permitting & Compliance team members by completing site investigations, drawings, emissions quantification, atmospheric dispersion modelling, annual environmental reporting and approval applications (ECA, EASR, NPRI, GHG, ChemTRAC)
- Assist in preparing proposal documents and help manage project budgets and invoicing
- Liaise with MECP and Client Plant, EHS and Site Managers/Representatives
- Support the Financial & Office Management Team with various tasks, as required including project filing and upkeep

The Ideal Candidate

- Bachelor of Science, Technology or Engineering Student
- Excellent communication and problem-solving skills
- Strong technical abilities with a willingness to be feet on the ground as needed
- Innovative thinker, idea contributor, and authentic team player
- Experience with Microsoft Office products - AutoCAD, AERMOD, ASHRAE, and/or Cadna/A experience would be a bonus!

This position requires a high level of communication skill, both verbal and written. The ideal candidate will be comfortable conversing with Senior Project Managers and Clients and be able to communicate report findings and recommendations. The candidate must demonstrate a high level of critical thinking skills in order to solve problems and deliver exceptional solutions and service to our Clients. The position does require short-term work-related travel therefore a personal vehicle is needed. All work-related travel expenses will be compensated. As COVID protocol allows, this position will predominantly require the candidate to be in the office, but may include working from home, remote sites, and in the outdoors. Occasionally, the candidate will be required to work outside of normal working hours (i.e. evenings and weekends).

More About Us

Since 1986, Altech has partnered with its large, loyal, industrial customer base to expertly identify and implement environmental solutions that help clients measurably meet their Environmental, Social and Governance (ESG) targets and improve compliance, while reducing their financial and regulatory risks. Altech's engineers and scientists combine long-term relationships with a flexible approach and deep regulatory knowledge, to help our clients meet their goals of optimizing profits while protecting and preserving the environment.

Property Due Diligence and Remediation

Altech performs a broad range of cost-effective site and subsurface investigations to support property transactional due diligence and site development, and to restore financial value to Clients' properties. With geotechnical, geoscientific and professional engineering expertise, our professionals conduct comprehensive contaminant identification, delineation, and migration studies, in addition to full remediation, geotechnical, and decommissioning projects.

Permitting & Compliance

As jurisdictional environmental permitting and reporting requirements become more complex, our engineers and scientists provide advanced air modeling, noise assessment and mitigation, dust and odour control, carbon footprint analysis and reduction, and stormwater and wastewater permitting support for a wide range of manufacturing Clients, to meet compliance obligations.

The team applies its up-to-date regulatory knowledge to ensure Clients' workplaces are always in compliance with the latest requirements in indoor air quality, outdoor air emissions, wastewater discharge, solid and hazardous waste disposal, and spills. Altech's specialized Environmental Compliance Audit, and custom Compliance Management Programs, deliver recommended actions that improve efficiencies and avoid potential liabilities.
